Washington Street Project Update - Request for Businesses WASHINGTON STREET PROJECT UPDATE:

1/18/2016-1/22/2016

Waterline crews have tied in be existing waterline to the new PVC line and will continue installing the last 350' of the project. Once that is completed, the crew will proceed with flushing and testing the line.

Tests may take up to two days. Once the crews have completed the waterline and testing, they will then proceed with the installation of water service connections.

Conduit Crew has installed over 500 feet in the last two days and will continue tomorrow (1/15/2016) installing 1" conduit through Pendleton towards The Plains road. Once that is completed, conduit crew will then return towards Liberty Street to continue boring conduit from Hamilton towards Jay street.

Once the underground conduit is in place, the contractor will begin the next, much larger phase of the project. This will entail brick sidewalk repair, as well as the installation of new street lights, intersection curb extension and brick crosswalks. The first step in this new phase is removing the old street lights so that the sidewalk repair can be completed and bases for the new lights prepared. Depending on how quickly Dominion Virginia Power can disconnect the power to the old lights, the contractor hopes to begin removing them within a few weeks. This means that Washington Street will be without street lights for an extended period of time. New street lights are projected to be phased into service between May 30th and the end of September, with the full project date still scheduled for completion by the end of November.

REQUEST FOR BUSINESSES/HOMEOWNERS ON MAIN STREET:

Please leave your outside lights/porch lights on at night. This will help with safety during the winter nights. Thank you for helping to keep our town lit up!
